

ScrapBlocker® drain system solids safeguard

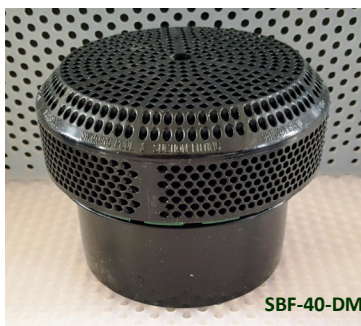

ScrapBlocker™ GREEN series drain system safeguards,
block food scrap solids for ***big savings & less drain pain***

- **PREVENTS** drain clogging & backups from solids, debris and grease
- **SAVES** time and money by avoiding emergency drain cleaning needs
- **EXTENDS** grease trap cleaning service - further reducing expenses
- **PROTECTS** the environment with cleaner waste water to sewer system
- **EASY** to install & secure - starts blocking solids and working immediately

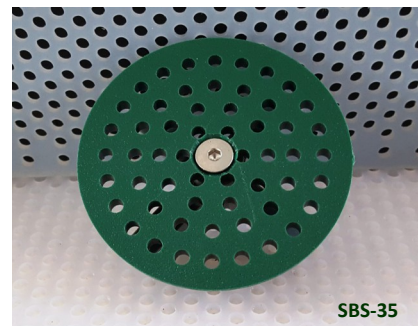

**New Design*

FLAT Style

Smart DOME

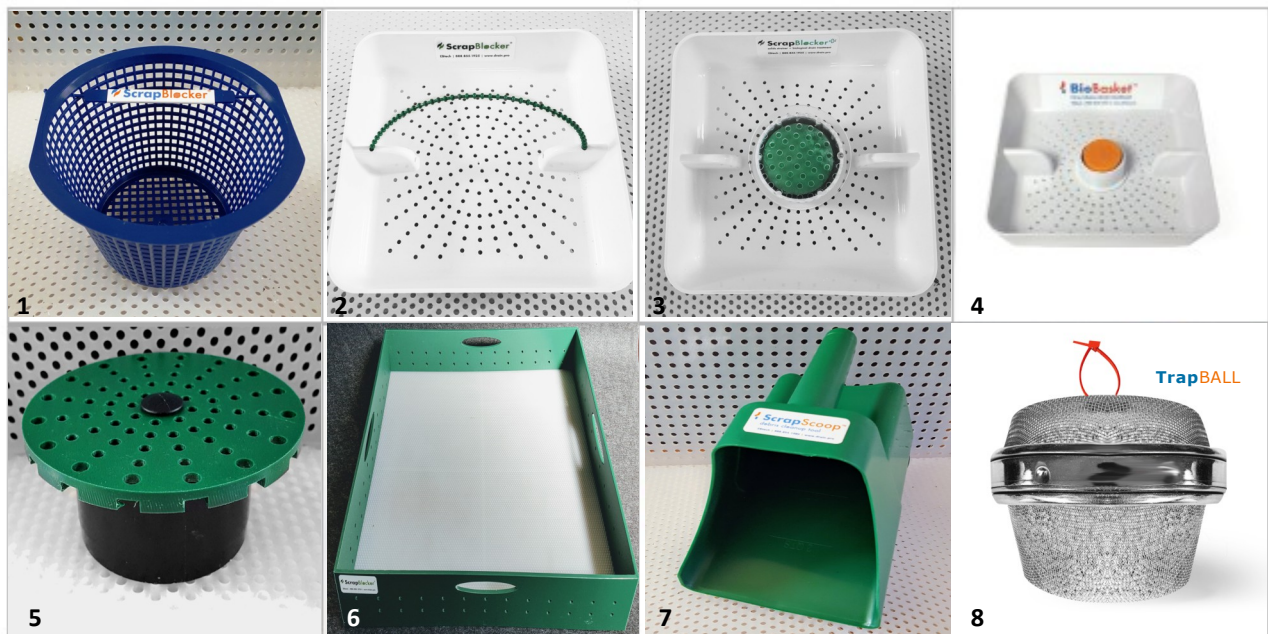

SINK Lock

ScrapBlocker Floor drain guards are available in **FLAT** or **DOME** style in drain sizes of **2"**, **3"** & **4"**. The insert style floor guards, flat & dome, are simple to install & are tamper-resistant by design. The new "Smart DOME" prevents smaller solids & debris while maintaining high flow capacity. The **ScrapBlocker Locking SINK** guard fits most **3.5"** commercial sinks with easy 1-2-3 installation.

Keep your foodservice drains flowing with ScrapBlocker™

ScrapTrapperTM food solids separator

The ScrapTrapper is a solids strainer that captures food scrap waste before it can clog in the drain or load up in the grease trap. Located at the triple sink or pre-rinse area, Scrap Trapper easily separates and collects the biggest contributor to drain pain - grease laden, wet food waste. Made from durable HDPE plastic and a stainless strainer drawer, ScrapTrapper is affordably priced, easy to install, and saves money ongoing by preventing emergency drain services. It may even extend grease trap cleaning for greater savings. Check out ScrapTrapper for your kitchen or food service facility, today.

Keep your drains flowing with **ScrapTrapper**TM
