

# **TrapBALL™**

**grease trap odor control & pH neutralizer**

**TrapBALL** is the new way to reduce foul odors in grease traps & interceptors. It neutralizes low pH with an eco-friendly process that inhibits odors & improves biological activity to digest grease.

TrapBALL applies a technique from wastewater treatment but in a small scale, simple delivery system. The stainless steel mesh "ball" allows flow in & around a proprietary mineral blend that raises low pH, ongoing. It works in small & large grease traps, interceptors, lift stations & sump pits.

**TrapBALL** comes in small, medium & large sizes & can stay effective for up to 3-months.<sup>2</sup>

## **What it Does**

- **Neutralizes & increases pH from acidic condition** > **Enhances Bio-Activity**
- **Prevents production of hydrogen sulfide gas<sup>1</sup>** > **Nullifies Noxious Odors**
- **Reduces sulfuric acid corrosion** > **Extends Plumbing & Sewer Line Life**
- **Accelerates FOG bio-remediation process** > **Degrades GREASE buildup**
- **Improves grease trap water quality** > **Helps Meet Local Code & Testing**

## **How it Helps**

**Stop the STINK** in your grease trap with ...**TrapBALL™**
