

LiFTstation™

biological lift station remediation treatment

EBtech's **LiFTstation** biological treatment helps to maintain, degrade & remediate organic waste build up in pump stations. A safe, eco-friendly way to improve lift station performance, have cleaner waste water effluent and to reduce foul odors.

LiFTstation is a multi-strain, high count microbial formula that is effective in a range of conditions including low pH. Recommended dosing treatment is with peristaltic pump & diffused aeration.

LiFTstation - Benefits:

- **REMEDIATES** organic build up in lift station with bio-active microbes
- **REDUCES** noxious odors & production of hydrogen sulfide gases
- **EXTENDS** lift station cleaning intervals and improves performance.
- **IMPROVES** FOG, TSS & BOD in effluent for better wastewater quality
- **PREVENTS** emergency cleaning issues caused by excessive sludge & FOG

Keep your pump station flowing with... LiFTstation™
