

# **SANOmist**™

HEALTHY HYGIENE MISTING SYSTEM

INTRODUCING **SANOmist**, a non-toxic alcohol-free hygiene system geared to prevent virus & pathogen transfer from hands, keys, credit cards and more.

The easy-to-use **SANOmist** dispenses “hands-free” a sustainable solution called **HOCL** (hypochlorous acid). Widely known as *nature’s germ fighter*, this versatile virucidal cleaner is commonly used in hospitals and commercial settings alike as a fast-acting surface **sanitizer** & reliable broad spectrum **disinfectant**.

Safe to the skin and non-drying, **SANOmist** refills with a solid **tablet** system. Simply adding tap water, the tablet produces an effectively neutral hygiene solution. No plastic bottle waste, no bulky storage & no hassle.

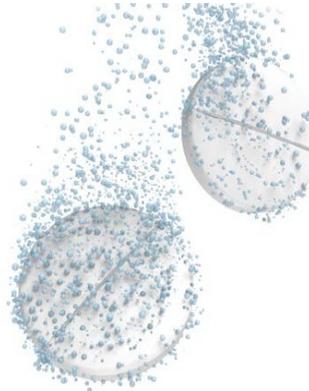

## **HOCL**

*Nature’s Germ Fighter*  
Water-Based Solution

Promoting healthy hygiene & preventing contagion has never been **easier, greener or more...timely.**

- Hands-free, rechargeable dispenser
- Safe solution, **non-drying to hands**
- Sustainable **tablet** format, add water
- EZ mix / refill system - 16 oz flip top
- **Reduces plastic waste** to landfill
- **EPA List N:** Products with claims for use against SARS-CoV-2 (Covid19)
- EPA Registered | NSF D2 Certified

# Nature's GERM Fighter

100% Safe, Non-toxic & Eco-friendly

**HOCL** (Hypochlorous Acid)... *a water-based solution.*

Discovered in 1834 by the French chemist Antoine Jérôme Balard and used in the medical field for more than 100 years. HOCL is a naturally occurring chemical produced by our white blood cells to fight bacteria and inflammation after an infection or trauma. Lethal to almost all known dangerous bacteria and viruses that threaten our health, HOCL is 100 percent safe for humans, non-toxic and safe enough for food contact surfaces. Unlike liquid bleach (sodium hypochlorite), even if accidentally ingested, HOCL is completely harmless. Yet, it is 80 to 100 times more efficient at killing microbial pathogens, including SARS-CoV-2, MRSA and Pseudomonas Aeruginosa, than chlorine bleach.

HOCL is used extensively in many industries such as clean rooms, food, beverage, dairy, biofilm, water treatment, agriculture, medical, dental and processing facilities. HOCL is approved by the FDA & USDA and our HOCL tablet chemistry has received EPA-approval for use against SARS-CoV-2, the virus that causes COVID-19.
