THE MISSING LINK FOR THE SINK

# ScrapDrain™

SINK SOLIDS SEPARATOR

ScrapDrain is the sustainable sink guard for the modern kitchen. It separates waste scraps **BEFORE** they go down the drain with greater capturing capacity.

The deep internal basket seamlessly strains solids for easy & tidy transfer.

Wash dishes as normal while ScrapDrain strains away the liquid, separates solids, and presents a one-step easy transfer for **local composting**, municipal pickup or a drop-off program.

## ScrapDrain - simply a better way for today

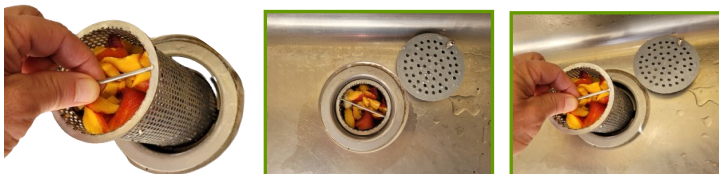

### A BETTER WAY FOR TODAY

\*Fits any kitchen sink with a 3-1/2" (90mm) drain opening

#### FUNCTIONAL & ENVIRONMENTAL BENEFITS WITH ScrapDrain:

- **IMPROVES** wastewater quality by reducing total suspended solids and FOG<sup>1</sup>
- **PREVENTS** scrap solids from causing clogs in drain lines & the sewer system
- **SIMPLIFIES** sink scrap collection & streamlines transfer to a compost option
- **DIVERTS** organic food waste from LANDFILL to reduce greenhouse gases
- **REPLACES** electric disposals with a more environmentally-friendly alternative
