

# SeptiShot™

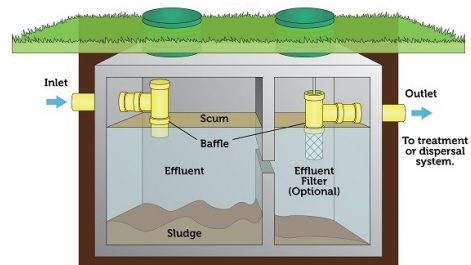

BIOLOGICAL SEPTIC TREATMENT **PACKETS**

**SeptiShot** offers a high-count microbial treatment to bio-remediate residential septic systems, holding tanks, RV's, lift stations, sump pits and cesspools. Biological septage organics treatment is a proven preventive maintenance tool for fewer problems, cleaner wastewater, reduced odors, and peace-of-mind.

**SeptiShot Bio Treatment** delivers **simple** dosing accuracy & superior environmental **science**.

SeptiShot Septic Treatment is a proprietary probiotic formula to treat ORGANICS in wastewater. The active microbes breakdown septage, sugars, and FOG (fats, oils, grease); digesting them to not reform and clog. The SeptiShot Bio treatment is natural, non-toxic, and safe for all drains and the environment.

- **SIMPLIFY** treatment dosing with single shot, soluble “toss” packets
- **REMEDiates** organic waste loading with high count microbial action
- **PREVENTS** drain system buildup issues from FOG, SUGARS & SEPTAGE
- **REDUCES** odors and noxious gases with counteractant technologies
- **IMPROVES** FOG, TSS and BOD for cleaner waste water effluent

**SeptiShot™**...superior **environmental science**

## PRODUCT INFORMATION

# SeptiShot™

### Formula Specifications:

#### Minimum Bacterial Count

3 Billion CFU/g | 75 Billion/packet

### PRODUCT PROFILE

#### Applications

- Residential Septic Systems
- Cesspools and Holding Tanks
- RV and Marine septage
- Lift Stations & Sludge Pits
- Grease Traps & Interceptors

#### Multiple *Bacillus* Species

- Naturally occurring, non-engineered
- Aerobes and facultative anaerobes
- Highly motile
- Positive chemotaxis
- 100% stabilized bacterial spores

#### Appearance

Dry granular tan powder  
in water soluble clear casing

#### Effective pH Range

4.25 – 10.0

#### Effective Temperature Range

5°C – 55°C (40°F – 130°F)

#### Shelf Life

Two years

### STANDARD PACKAGING

10-PACKETS per JAR | 6-JARS per CASE

Packet weight: 25grams | 75 billion cfu/packet

Item#  
EB SGT-75

### STORAGE AND HANDLING

Store in a cool, dry location.

Do not freeze

Wash thoroughly with water  
if exposed to skin or eyes.

### **DIRECTIONS FOR USE:**

#### *RESIDENTIAL*

**Septic/RV Systems:** Flush single packet down the toilet or toss pack directly into septic or holding tank, in use, or after pumping. For preventive maintenance dose a pack per week or per month as needed.

**Cesspools:** Same as septic system but for larger tanks consider multiple packets per week to prevent leach field blockages and maintain proper operation.

#### *COMMERCIAL*

**Lift Station/Sludge Pit:** Toss packet directly into lift stations or sludge pits. Multiple packs in larger areas.

**Grease Traps:** Mix packet with water in pitcher and pour solution in drain leading to grease trap. If accessible, toss packet directly into grease traps both indoor & outdoor units. For traps over 500 gal., consider multiple packets per treatment.

**Compost Piles:** treatment packets can be used as a compost accelerator. Cut casing corner and spread dry powder across organic waste pile.
